

Intertel Palantir CIA Mossad Mafia Steven D Kelley Show TCR August 14, 2025

Monday, August 19, 2025 00:00 HST

SUMMARY KEYWORDS

Intertel, Palantir, CIA, Mossad, mafia, data collection, surveillance, government control, medical records, HIPAA violations, encryption, PayPal, eBay, Trump, Occupy the Getty

SPEAKERS

Steven D. Kelley

SUMMARY

Steven D. Kelley presents his theory that a single organization called "Intertel" controls what people perceive as separate entities like the CIA, Mossad, NSA, and various government agencies. He claims Intertel is essentially a global mafia that has consolidated power since the Nixon era, using data collection as its primary weapon. Kelley connects his personal experiences from the 1990s involving Iran-Contra operations and his brother's invention of high-speed internet encryption to the current surveillance state. He argues that companies like Palantir, founded by Peter Thiel, are extensions of this Intertel network, collecting vast amounts of personal data including medical records, financial information, and digital footprints. According to Kelley, this system represents the "worst case scenario" of big brother surveillance, where every aspect of citizens' lives is monitored and controlled. He promotes his "Occupy the Getty" mission as the only solution to this overarching conspiracy.

MORAL

According to the speaker, the only way to stop this complete surveillance and control system is through the "Occupy the Getty" mission, as all other resistance efforts are futile against the consolidated Intertel mafia network that controls every aspect of government and corporate power.

TRANSCRIPT

[00:00:01 - 00:00:40]

Hello everybody. My name is Steven D. Kelley and this is the Steven D. Kelley show and we are Truthcat Radio www.truthcatradio.com. [Music] It's August 14, 2025. It's now 6 pm in La Puente, California. I had a title for the show. What is it? I'll just give it to you here real quick. Uh oh, wasting time. I know. Intertel Palantir CIA Mossad Mafia. Don't worry about the title. Look, okay, just pay attention. If you're listening to this much of the show so far, that's good.

[00:00:40 - 00:01:12]

You need to listen to the whole thing. Rarely do I do a show that is important as the one I'm going to do tonight. Mostly because the information is going to affect every single one of you probably for the rest of your life. And if this doesn't give you motivation to complete our mission and let you visually see exactly the nature of the enemy that we're dealing with and what they have doing done and are doing to you as we speak, then you're you're lost. So, we're going to spell it

[00:01:12 - 00:01:48]

all out tonight, but you need to pay attention and you need to stick around and you need to stay to the end. And hopefully hopefully it's not going to go everybody's head. But here's the thing. I myself like all of you most humans sometimes I can have something right in front of my face and I won't see the significance or I won't connect the dots or I won't understand what it is that I'm looking at or why it affects me or why I should pay attention. kind of like me and the Occupy the

[00:01:48 - 00:02:22]

Getty mission and all those people out there that notice and maybe not notice but you know don't really understand why it's significant or what it has to do with them or anything. It's kind of the same thing. Years and years and years go by before if you're lucky something snaps and you go, "Wait a minute. Now I get it." Well, I've had moments like that a lot. But, you know, I'll tell you, I'm guilty of being oblivious. And many times in my life, this has happened because of my dealings

[00:02:22 - 00:02:56]

with the CIA and the the mafia and all that sort of thing. And and I'm like everybody else. I think I'm just a normal person. And this thing this sort of thing doesn't happen to normal people. And it's only in the movies. And we're programmed to think that this is just drama and fiction and so much uh you know so much television. Well, the reality is is that every single aspect of your life is affected by this. And hopefully you're going to see it tonight. And and the enemy does a really

[00:02:56 - 00:03:31]

good job of hiding. And and right now we we've reached a moment where there really is nowhere left to hide. and it's right in front of your face and and all the little changes and and you know things that they use to try to control the narrative are just not quite working. Now I will mention that that Grok, you know, Grok had a big time out. Grok actually was suspended from Twitter, which is funny because, you know, like I said, unlike a human, they let him back. They just had to reprogram him. Kind of like re-educating a human. We don't get that.

[00:03:31 - 00:04:18]

But anyway, the point is is that Grok comes back after day of reprogramming and tells everybody that the reason why it was shut down was because it probably had said something anti-semitic. Well, in what we found out was that what it did say was that uh yes uh Israel was committing genocide. the United States was complicit and Netanyahu was a war criminal. And also went on to say that of all the leaders out there that Donald Trump was probably the worst felon criminal in Washington just by the basis of all his indictments. So these are all interesting things. But anyway,

[00:04:18 - 00:04:50]

that all got swooped and swiped and gone. But you know what I think really happened? What I think really happened is that the truth of Intertel has come out. It's been out there, but suddenly because of Palantir, it's a big deal. And if you haven't been paying attention, it's going to take over your life. It's doing that right now. Now, what got my attention, of course, is Nick Fuentes talking about Intertel and linking it to Palantir and things like that. And you know,
[00:04:50 - 00:05:26]

I I was oblivious to that. But but here's the thing. I don't know how old Nick Fuentes is, but my experience with Palantir, not Palantir, but Intertel started back in 1990. Was it 1990? Yeah, 1990. Yep. 1990. Iran Contra. All kinds of things happened. So, we're going to we're going to look at a timeline. We're going to talk about Intertel. We're going to talk about the CIA, the NSA, and the mafia and all that stuff because remember, like I said, I was fooled. I didn't know what I

[00:05:26 - 00:06:10]

was what I was doing when I when I Well, I'll just, you know, my own story before I get into the deep history. I'll just remind everybody that it was in 1987 when I had my first interaction with what I thought was CIA. Of course, this turned out to be people connected to Don Nixon who would turn out to be Intertel, but we wouldn't know that. We would just accept, oh, okay, CIA, CIA, sure. This was during the whole getting arms to Iraq business. Anyway, it wasn't until the Iran

[00:06:10 - 00:06:57]

Contra thing sometime around 1990 when I got involved with them again what I thought was the CIA only. It wasn't. It was the NSA, the Oliver North gang. And I was again directly directly providing material to the Oliver North gang for use in the war, the guerilla war, the terrorist operation that the United States was conducting with the Contras in Nicaragua. That was terrorism. That was the NSA. That was the Oliver North gang. But I didn't I still thought it was the CIA. I didn't know. It wasn't until years later when I got into another gig with the CIA working on the

[00:06:57 - 00:07:29]

plasma beam representing them and I took the gig that they told me before I took the gig that oh that was Oliver North that you were working with. That wasn't us. I had no clue. I I mean I should have known it was right in front of my face. But I did not know. But other things were also right in front of my face, like Don Nixon, the guy that recruited us and the events that took place with my brother and his interactions with Don Nixon. I mean, while I'm busy doing all this stuff with

[00:07:29 - 00:08:18]

the NSA and the Contras, there's all these other things going on with my brother and myself in the background. One of which was my brother basically conning a bunch of money out of Don Nixon, the nephew of Richard Nixon, the president of the United States, who was working for the number one mafia kingpin in the world at the time, which was Robert Vesco. Now, when I say number one mafia kingpin in the world at the time, we're going to explain what that means and how that works by explaining to you Intertel and the history of Intertel and where Robert Vesco fit in and where

[00:08:18 - 00:09:02]

Nixon fit in. But the bottom line is that at the time that this was going on roughly 1990, Robert Vesco was holed up in Cuba. Imagine that. Because he had been kicked out of all the other countries that he had been seeking refuge like Guatemala, Honduras, and various different islands. He tried to buy an island in the Bahamas, but you know, the Bahamas, we're going to be talking a lot about the Bahamas, but that's where all this stuff was based. But anyway, bottom line is that he was arrested and thrown in jail by Cuba, by Castro. Now, [00:09:02 - 00:09:40]

why now what one of the things that I did not realize, which should be clear here, why did they do that? Well, people could say, "Well, it's because he was a big drug smuggler and he broke laws that went against the rules in Cuba." But it was worse than that because Intertel Mafia was the mafia that put the hit out on Castro and made all the attempts on Castro's life. It was the mafia that did the JFK assassination, etc., etc., etc. People go, "That was Mossad. That was the That was Italian. That was these guys. These guys, these guys.

[00:09:40 - 00:10:22]

It's the same thing. This is what we're going to show you. It's all the same thing. Well, that little event put me right in the middle of this whole Intertel saga because even back then, we knew we knew it was Intertel. That was one of the things they they they used the word. Now, I I find it funny because there was an idiot in one of these little groups that I'm in, Tinfoil Hat Group, BMC, whatever. Some guy he does he does countertops for a living, you know, trade guy. But he he gave me shit because I said, "Hey, I'm doing a show tonight about I'm

[00:10:22 - 00:10:57]

explaining the connection between Palantir and the mafia and the CIA and everything and put it all together for you." He says, "Ah, you're just saying that you were working for Intertel because the Nick Fuentes uh mentioned it. Again, I don't know how old Nick Fuentes is, but my association with Intertel is uh let's see what what is that 35 years old. 35 years old. All right, let's let's start this little journey. This little this little journey. Now, now you see the thing

[00:10:57 - 00:11:43]

that that really got my attention before I start going into the ancient history of uh of this mafia and how they became the number one mafia in the world. What really could got my attention of course was well Peter Thiel and Elon Musk. Now, the Elon Musk connection blew me away because as I started connecting all these little dots and looking at the dates, a lot of stuff really hit home, especially very very personal stuff and stuff that has huge huge implications for the entire world. So, let's let's let's go back to the very beginning here. Now, first of all, I suppose

[00:11:43 - 00:12:28]

you could go back to the Rothschilds and you could have all these different mafia acting all over the place and the Khazar mafia and the, you know, the Russian mafia and all these various mafias. But during the time of Lucky Luciano, who was a big mobster, you can look him up. He set up an organization which was pretty extensive. I think they called it the Corporation. But uh his operation was extensive and of course it involved money laundering and and all sorts of things and he had of course gambling and casinos and things operating offshore in the Bahamas. Wonderful,

[00:12:28 - 00:13:03]

wonderful little thing he set up. But anyway, he got he got put in jail. He got shut down and he was basically shut down by Thomas Dewey. I guess Thomas Dewey was a prosecutor over there in New York. He ran for president. But the thing is is that what he really was was mafia. Another kind of mafia. CIA. Not just CIA, but Khazar mafia. Okay. The enemy. You know, that's the thing is that Khazar mafia gets in law enforcement and they go, "Look what we're doing. We're taking down

[00:13:03 - 00:13:43]

this Italian mafia. What are they really doing? They're consolidating power." That's that's our government. But but you see those kind of wars, they took place for a long time and they didn't really end until say Nixon. And it was Intertel that was really played that role in ending it all. Now, as I as I said, the Dewey set up, he took this operation of uh Lucky Luciano's, and he turned it into a CIA operation, at least a legend CIA operation. But again, one of the things

[00:13:44 - 00:14:19]

we're going to learn is when I say CIA, what I'm really talking about is Intertel Mafia. Okay, that's that's an interchangeable word. When I say NSA, I'm saying Intertel Mafia. When I say Mossad, I'm saying Intertel Mafia. When I'm saying Israel, I'm saying Intertel Mafia. When I say Chabad, I'm saying Intertel Mafia. I hope you I hope you're getting the picture. But anyway, so there was a guy Crosby. He took over. he was a big guy in this thing and he ran

[00:14:19 - 00:15:11]

Resorts International and he died or he uh was incarcerated, whatever, he turned it over to Donald Trump. But more and more stuff was going on. And it was in the early 60s that this entity that they would call Intertel, which would be just some sort of public name for this mafia operation, would begin its attack on on Fidel Castro quite a bit. So when you when you think about 60s mafia operations, that's that's really what we're what we're talking about. But eventually, I don't know when exactly the date was that they did this, but they they started calling themselves

[00:15:11 - 00:16:01]

a private eye firm. Okay, I believe this is probably during Nixon, but what they did was uh remember bear in mind this is a mafia calling itself Intertel, but they build themselves as experts on consulting with government bodies and private entities, corporations and such and helping them, consulting them in such a way that they could avoid the inconvenience of doing business with another company or firm or government or entity that would actually be mafia. This was actually their business model. This is a private company. And the way

[00:16:02 - 00:16:46]

that they did this was they crunched data. They've been doing this since forever. They would look at everything they get as private eyes and they would crunch this data and they would use it to create dossiers on everybody and everything. And this is how they knew. But of course they knew who all the mobsters were because they were the mobsters. And what happened essentially was that all of the other mafias had no choice but to join that corporation to become part of this grand conglomerate of mafia bodies that was Intertel because that was the only way they

[00:16:46 - 00:17:35]

would have access to any corporate business. It was, in other words, if if you wanted to deal with the government, if you wanted to play in the big leagues, you had to join this Intertel

thing because they had the monopoly on access to official government circles and corporations. And they did this because of this public entity that they called Intertel. Because here's the thing. A public entity, when I say public, I mean a private entity, meaning a company, a corporation, has certain, shall we say, freedoms that a government entity doesn't have,
[00:17:37 - 00:18:19]

like the CIA or the Department of Justice or typical law enforcement FBI. They're going to be restrained by certain rules and integrity and all that sort of thing to keep them from doing certain things in their pursuit of whatever it is they're trying to acquire like information. Now a private institution like Intel doesn't have these restraints and can do whatever it wants and then present its findings or what it suggests are let's just say admissible evidence in court and everyone

[00:18:19 - 00:19:05]

else will overlook. And this is this is something that you'll see is very common now even when we talk about real estate fraud and government takeover of of real estate. You're seeing private enterprises, billion-dollar corporations, developers becoming quasi public institutions, public entities by creating homeowners associations and housing ventures and complexes. And this is happening all over. And this is this is how they create slush funds. This is typical. You're going to see that everything we talk about is mafia. But anyway, this is what they did.

[00:19:05 - 00:19:56]

So that was around Nixon. So basically after Nixon, it all became one big mafia. And bear in mind, all the Italian mafias and Colombian mafias and Russian mafias, Chinese mafias and all that, they were still out there. They were still doing their thing, but they were operating under this Intertel umbrella. Well, let's see what else happened. Well, somewhere along the line, this concept data collection became the basis of everything and always has been. Now, I'm going to kind of skip ahead to where I get involved. Now bear in mind Epstein and

[00:19:56 - 00:20:34]

these guys it's all the same thing. I mean when I'm talking about my associations with Vesco assume that that's Epstein that's Trump that's all these guys but again what's interesting of course is the the Musk and Palantir stuff Peter Thiel. So let's let me see if I can look at that. I'm going to do my best to kind of give this to you in a nice nice clean way. I want to get I wanted to try to come up with a nice timeline, but I'll I'll do my best. But let's just say this is that

[00:20:34 - 00:21:34]

Well, what's Oh, okay. Here we go. All right. Peter Thiel, who happens to be gay and Jewish, started a company called Confinity. That was in 1998. And Elon Musk, he started a company called Xcom. That was in 1999. And those companies in basically a year later, they merged and they became PayPal. Well, they merged and became PayPal. But roughly a year later, they were purchased by eBay. Now, here's the thing. PayPal was funded by Intertel. It was funded by, when people say it was funded by Mossad, it was funded by the CIA. This was in the year 2000. What

[00:21:34 - 00:22:21]

they're saying is it was funded by Intertel. So this is mafia and coincidentally enough in 2002 eBay buys PayPal for 1.5 billion. A steal, right? Well, the thing is is that eBay is CIA. You

could say eBay is CIA. I used to run around say, "Well, all these corporations like Lockheed and this company and that company, they're CIA." No, they're Intertel, okay? Slush fund money that funds these companies. And bear in mind, you know, these intelligence collection agencies, these spy
[00:22:21 - 00:23:12]

agencies, they're going to be investing in all of the new tech. And of course, this new digital money thing, that was a big deal. Now, certain things had to happen for PayPal and eBay to come into existence incidentally, coincidentally. And back in roughly 1990 when I was dealing with the NSA or Intel, I was involved in Intertel. I had my big falling out. And of course uh shortly thereafter my brother had his big falling out and you know subsequently this caused the you know incarceration and eventual death of Robert Vesco the head of Intertel. But one of the

[00:23:12 - 00:23:57]

more interesting things that happened sometime shortly after the year 2000 was or the year 1990 was that my brother became involved in ultra fast high-speed imaging ultra fast CT scanning or imaging modern imaging and back in those days when this was somewhat in its infancy See, the resolution of the scans were pretty incredible because a lot of data was used. In other words, when you had a scan done, you got a you got the full treatment. Of course, if you go have a scan now, you're only

[00:23:57 - 00:24:35]

going to see segments. You're not going to see the full body digitized, but back then, that's what how it was done. But what's important is that this was a medical procedure. It was digital. It was being performed at the location where this machines were that had computers that would store this data. And this data had to be able to be available to general practitioners, doctors, whoever down the line, medical personnel that would want to review these images for the purposes of diagnosis and treatment. That's what the that's the purpose of the whole technology.

[00:24:35 - 00:25:24]

But in order to do that, a method had to be created so that these files, these digital images, these medical images, these private images of a person, these scans could be sent over the internet and retrieved by the private doctor without anyone along the way gaining access, compromising, and you know, ruining the whole HIPA thing, the Health Information Privacy Act, which basically says that anytime anytime this information is being transmitted, it needs to be protected so that it's not divulged because this is a huge crime to divulge and abuse

[00:25:24 - 00:25:56]

patients medical records. Now, this is a big reoccurring thing, people. This theme right here, violation of HIPA agreements, is going to become a very, very big thing because ultimately every single aspect of Intertel and Palantir and all the various little BS agencies and entities that have sprung up to try to hide what's going on here are all doing the same thing. They're gaining access to every single bit of your data and we're going to make a list of the data that they're getting

[00:25:56 - 00:26:52]

and they're putting it in a big huge database that they can crunch with algorithms and do whatever they want with. That's big brother. That is the worst case scenario that's

happening right now. Trump has actually given Palantir what is it a hundred 1.5 billion to set up a database on every single human in the USA. Now back to the 90s when this scanning technology was being developed couple things that were interesting. First of all, Clinton was president during the time and when he learned about this scanning technology, he says, "Hey, we need to scan everybody. We need to

[00:26:52 - 00:27:34]

get a digital scan of every human and store in a big giant database." That was something that they wanted to do. They thought, "Yeah, we need to do this." That was biometrics. Okay? Not just any kind of biometrics, but biometrics that contain every single aspect of the insides of your body, the keys to your health, everything, not your DNA, but every aspect of your internals. Now again, like I said, in order for this information to be sent over the internet, it had to be encrypted so that it was private and it could be recovered and decrypted and

[00:27:34 - 00:28:29]

recovered and no one else that wasn't supposed to have it wouldn't get it. Well, here's the thing. My brother invented high-speed internet encryption for this purpose. He basically paid somebody in India to write the software and then patented it. Anyway, without this high-speed internet encryption, there would be no eBay, no PayPal, no internet as we know it, nothing. Nothing. None of that. No Amazon, no YouTube. None of it. It all depends. Highspeed internet encryption. So, this is where it starts. Now, we like to say,

[00:28:29 - 00:28:58]

you know, those of us that are inventors and we're we're in the business, we used to know, there's certain things we didn't say, we didn't write down, we didn't talk about over the phone, we didn't email. If you had information that you didn't want the CIA to have, you didn't you didn't put it out there, okay? You didn't say it because we knew that was just one of the things we knew. Business ideas, this or that, whatever. But you know what? Highspeed internet encryption. Are you

[00:28:58 - 00:29:49]

kidding? They they ran with that. They took that and they created the world that we know today. So, does it surprise you that eBay buys PayPal or that PayPal was Intertel CIA that they created the software for it or guys like Musk or Thiel were involved? Why were they involved? They're intertel. Intertel goes out and gets everybody. They give them money. They invest money in them just like they gave my brother money thinking he was going to do something because they thought he was me. Of course. And that eventually led to the death of Robert Vesco. Interesting, isn't it? Well,

[00:29:50 - 00:30:29]

let's let's go back here back to Musk and those guys. So, when all that was going on, I I had no clue. But but the fact that they were asking for they were Clinton had been doing the human genome project. Maybe you heard about that. Well, that was just being created about the same time that the scanning technology became available. about the same time that highspeed internet encryption was created and about the same time they realized what they could do with it thanks to Mr. Musk and

[00:30:29 - 00:31:25]

Mr. Thiel. So what what happened? Let's see. Uh well, let's see. They took their money that they got from eBay and Thiel, he set up hedge fund companies. He set up Clarion Capital. He

set up uh Valor Ventures. You see that was in 2010. He set up My Mithril Capital 2012. But in 2004, he set up Palantir. Now, when he set up Palantir, it did nothing but serve the CIA. Nothing but. That was it. Oh, he also bought 10% of Facebook. Now remember, we're talking about the guys that basically stole highspeed internet encryption almost
[00:31:25 - 00:32:13]

owns 10% of Facebook. Is that a big surprise? He's Come on. They, you know, it's like too big to sue. Nobody can sue eBay. Nobody can sue Facebook. Nobody can sue AOL. Nobody can sue any of these big huge damn things. Nobody can sue Tesla. Nobody can sue Musk. They've got too much money. It's like Trump. You can't you can't sue them. Ought to be a law, huh? Okay. So, so like I said, Palantir was was CIA 100% CIA. In 2001, we had 911. Now, we all know that was a big Intertel Mossad CIA false flag.

[00:32:13 - 00:33:03]

It was Intertel. Let's You don't even need to say Mossad. It was Intertel. They had their wildfire. and and then after 911 they had their Patriot Act, but most importantly they had the algorithms that allowed them to crunch all this information and find what they were looking for. And that was the basis of Palantir because basically after 911 after a few years they had to stop the intruding on the rights of Americans and the outright spying on everybody because it kind of looked bad that the US government was getting busted spying on

[00:33:03 - 00:33:57]

everybody. So they shifted it to a private firm with no transparency and no oversight. And that was Palantir. That was 2004. So, like I said, for years and years, they only did CIA work. That's all they did. Uh, you know, and then they got they started doing their whole medical crap and what have you, but it was Intertel the whole damn time. Now, Musk, he took his money from this, you know, 1.5 billion sale to eBay and he started uh SpaceX. Oh, yeah. What a great idea. SpaceX. Who do you think funded SpaceX? Intertel, the CIA, the Department of Defense, the government mafia,

[00:33:57 - 00:34:33]

the mafia that was the government. You know, we didn't even talk about Howard Hughes. I should talk about Howard Hughes really quick. There was a little story here. Maybe I can find it. It was in Harper's Bizarre. Don't let me forget Datavant. It's one of the latest companies that just just bought it. Just bought Intertel. Hey, before I start talking about Howard Hughes, I'm just going to mention Intertel became what do they call themselves? Here it is. Ontellus company, okay, a medical

[00:34:33 - 00:35:05]

canvassing group. We'll talk about how that what that actually means medical canvassing. But that wasn't that long ago. Now, now that's basically when a big fish swallows a little fish, but then it assumes the identity of the the big the little fish. Okay, that's and in this case, Intertel buys Ontellus and then calls itself Ontellus. Like it's just it's like what? What? Intertel? What? We're Ontellus. We're on Ontellus. Intertel that's Ontellus company. You know, it's kind of like when I worked

[00:35:05 - 00:35:43]

for PerkinElmer. PerkinElmer got bought by EG&G. EG&G is one of the most notorious contractors over in Area 51 and uh and they buy PerkinElmer, you know, a much smaller company. Uh a significant company, but still much smaller. What do they do? They start

calling their whole conglomerate PerkinElmer They dropped the inconvenient EG&G name. Uh anyway, like I was saying, back in the 60s when they were doing this, let me see if I can find the little story. One of the big they they didn't hide

[00:35:43 - 00:36:20]

it. They had everybody working for them. See, I've got all these little stories of Intertel. I should be able to find this here pretty quick. But uh Oh, here it is. Spies for hire. Okay. Now, this came out in 1974. All right. What was it? December 20th, 1974. I was still in high school. Harper's magazine reports that a privately owned intelligence gathering organization has quietly expanded into a worldwide spying and security network that in many ways rivals the CIA. The organization in question based in the Bahamas is named International Intelligence Incorporated and

[00:36:20 - 00:36:59]

is known as Intertel by its multinational corporate clients. Among the individuals and groups linked to Intertel, according Harpers are Howard Hughes, Robert Vesco, Richard Nixon, Bebe Rebozo, Eh, Howard Hunt, the ITT Corporation, and allegedly members of the mafia. Okay, ITT, that's code for Nazi. Okay, throw that in there. They they did the Philadelphia Experiment. They're Nazis. Intertel after being created by a gambling interest in the Bahamas, that means mafia in the early 1960s had expanded to the point where it now has offices discreetly located London, Toronto,

[00:36:59 - 00:37:36]

Washington DC, New York, and Los Angeles. This mysterious corporation, Harper states, is for hire by major multinational corporations around the world. It functions, the magazine says like much like a private CIA gathering intelligence data on individuals and political movements posing a threat to its clientele. The current staff of Intertel reads like a who's who of intelligence agencies. Among those on the intertel payroll are former top a former top agents of the CIA, the FBI, National Security, NSA, Federal Drug Agencies, Internal Revenue, Internal Revenue,

[00:37:36 - 00:38:10]

US Organized Crime Strike Force, and Defense Intelligence Agency. Now, here's the final line. One of the Intertel's most famous assignments was to secretly spirit Howard Hughes out to Las Vegas to the Bahamas four years ago. All right, let me just tell you a little quicky story about Howard Hughes who would at the time was extremely wealthy, but he was extremely important man. They didn't spirit him out. He didn't pay them to do it. They kidnapped his ass. They kept him locked

[00:38:10 - 00:39:00]

up. They controlled him. They took him over until he died. They looted his fortune, looted it. And one of the things they did was to take the Howard Hughes Medical Agency or whatever the hell it was, the corporation, and they passed laws. This was Nixon, of course, which basically privatized profitized all medical in the United States because before that it was not for profit. It was a public service. All medical was a private was a public service in the United States. Everything in the United States, all medical. And they took that away and it became what it is today.

[00:39:04 - 00:39:48]

It's true. Anyway, the point is, if you look at these agencies, it's upfront in your face. It's mafia. It doesn't rival the CIA. It is the CIA. It smells like mafia. It is mafia. It's in the

Bahamas because it's mafia. Just like Epstein, just like Epstein Island, just like Vesco, all that shit It's offshore. They did illegal crap. Why did they have people in the organized crime strike force? So they could prey on the other mafias until they all became Intertel. Why [00:39:48 - 00:40:31]

did they have people in the IRS? so they can screw with your tax records and they can find out dirt on you. But they decided that the real pay dirt of course was in medical and that's why they went into that whole so-called medical canvassing thing. So now what they've done, and by the way, as I mentioned, this company I was just telling you about Ontellus, it it just got bought. It just got bought by another company supposedly. I don't have it in front of me now, but data whatever I said the name earlier. Anyway, that just happened this year. This is how they

[00:40:31 - 00:41:27]

hide this crap. Let's talk more about what Ontellus does Musk and these guys. Now, now, like I said, Palantir got a 1.5 billion contract from Donald Trump to basically set up a spy spy system on all of us. All of us. Now here Peter Thiel is a JD Vance guy. He owns JD Vance. Now, DOGE that came in as the Department of Government Efficiency was given free reign access to all government records, including your tax returns, all your legal stuff. And my social security, motherfuckers And I'll tell you,

[00:41:27 - 00:41:53]

this hits home deeply because, you know, I I like to take my social security money and I like to go buy pot, but I don't need the government knowing how much pot I buy, where I buy it, what strain I buy, what date I bought, etc., etc., etc., and how much money I paid. Don't need that. But they use all of that information. They collect all that information. If you're using a debit card, you're screwed. And they're forcing me now to use a debit card. I can't just get my paper

[00:41:53 - 00:42:26]

check in the mail and go to Walmart and cash it and go spend my cash freely with no worry about somebody keeping track some Palantir keeping track of me like they're actually doing. But that's what they're doing. So So what else what else does this uh Palantir do? Well, you know, in the pursuit of evidence, they're going to do everything. They're not just going to crunch all of the data on the internet and everything. Yeah. Hell, they'll use spy drones to follow up on you. Now, of course, they use greed to sell these services.

[00:42:26 - 00:43:02]

They market this as a a service to insurance companies, okay? Like this Intertel or Ontellus group, this medical canvassing. What the hell is that? Okay. Insurance claims, fraud investigation. again. You know, I just got to remind you guys this pisses me the fuck off because it's fuckin Grok and all these other assholes have been playing down this mafia shit from day one, saying, "Oh yeah, it's just medical canvassing. It's innocent. It's no big deal." These are the same

[00:43:02 - 00:43:40]

guys that wanted to build a database of whether or not you took your your shot, your COVID shot. They were going to do that. What else they do? They will search your storage facilities to see if for property loss. They will search all s social media including the deep web. They will search all your past treatments for medical history. They will verify all insurance coverage and dates versus date of injury. They're actually involved. They will look for drug

addiction. They will investigate drug compatibility. They're involved in your doctoring right now. attorney information,
[00:43:40 - 00:44:13]

any information legally, they're going to know. They're going to dig deep and they're only going to provide what's court admissible. What's court admissible? But you know what? All of this is a violation of HIPA. All of this is CIA. All of this goes through Israel. All of this is mafia. It's all going through Israel. Israel has complete control because that's just where the mafia is. And you know Musk when he came in there with his DOGE and gave access was given access

[00:44:14 - 00:44:40]

to everything. Guess what? That's gone now. But you know what? All those DOGE people, they're Palantir people. They're all CIA. They're all in the safe and they're going to spy on you and they're going to know everything about your education, your health, your taxes, your social security. They're going to have all your imaging records. Imaging. There's that imaging again. your emails, your phone calls, all your social media, all your internet. They're going to get your DNA.

[00:44:40 - 00:45:16]

They're going to know everything about your family and your entire work history. And that's what they do. They got you by the balls. And the only thing that's going to stop this, do I need to tell you what's going to stop this? I think you know there's only one thing. Occupy the Getty, right, people? Here's the thing. If you can't see that everything's a mafia, it's not it's not that the Well, let's put it this way. The CIA doesn't control the mafia. The mafia controls the CIA.

[00:45:16 - 00:45:50]

The mafia the CIA is the mafia. Everything that you want to blame on whoever 911, Israel, Mossad, Intertel Mafia. JFK assassination, Intertel Mafia. COVID, Intertel Mafia. All the wars, Intertel Mafia, everything. Donald Trump, Intertel Mafia, every fuckin thing they're doing. Intertel Mafia. Let's not forget Tesla and Boring Company and all that. You're lucky they didn't get their vaccine ID shit but they're going to get it anyway. It's not going to matter because they're

[00:45:50 - 00:46:24]

going to have all your DNA and everything in one big database. And you know what? Ultimately, it all goes back to that internet, that highspeed internet encryption that made it all possible way back when. I suppose I had a little role with the whole computer technology. But either way, either way, if you can't see by now that there is no government, there's no law enforcement, there's no political parties, there's no borders, nothing. It's just a big mafia war going on.

[00:46:24 - 00:47:08]

This is what we need to focus on. Yes. And obviously Occupy the Getty is the answer because those Getty guys, those Nazis, all that stuff that is Intertel. It's always been Intertel. It's all intertel. It is the corporation that holds all these things. And you know, I'll tell you, every day, these guys, their money, these CIA guys, these mafia guys, they're buying up companies that have access to medical data, and they're making it all part of this big giant group, all connected to this Palantir crap, this internet, this Intertel crap, this mafia spy

[00:47:08 - 00:47:42]

gear every day. So, at the very least, this entire thing this one big HIPA violation, all of it. But because these companies are sounding legit, hey, insurance, you know, that's a big scam, they need this information, right? So they can deprive you of your benefits. And they can say, hey, you went to the health club, you're smoking pot, you did this, you did that, you're not going to get paid. We're going to take away your social, we're going to take away whatever. It's coming. We're going

[00:47:42 - 00:48:14]

to turn off your computer. It's coming. Social credit scores. It's all coming. Nothing can stop it except for Occupy the Getty. All right, people. Obviously, I could have done a better job. I could list this, but if you're not paying attention and yeah, I have a connection been connected to it since like forever. And so, yeah, I have a I should have seen it. But now, if you don't see it and you don't do anything about it or you're just going to live with it, it's already too late.

[00:48:14 - 00:48:45]

It may be too late, but who cares? You still need to keep working on this Getty thing because if you haven't learned anything, as they know everything about you already, everything. And they certainly know if you're one of us and if you're a part of this Getty mission, obviously they know that. If you want to help me out financially, hey, PayPal, stevenkelley714@yahoo.com. They obviously know you're sending me money, but you know what? Fuck them. They're not going to hurt you cuz you know

[00:48:45 - 00:49:21]

that sounds really sad. You send me money and you'll have protection. But I don't give a damn. You're you're in my circle, you're protected. Fuck them. They are they are more afraid of us than we are of them. And if you need more proof of that, just remember Robert Vesco was the head of Intertel. He died in a Cuban jail because of me. Okay. You're welcome. All right, everybody. I'm gonna leave it there because I don't know when this thing's going to turn off, you know. But, uh,

[00:49:21 - 00:49:58]

again, I want to thank you for being with us and and if you can help me out on the PayPal, please do because I'm trying to save up and get some new glasses. Seriously, they're like 800 bucks a piece. It's really awful. But, uh, yeah. And sometime this week, I got to go down in social security and make it so they could give me a damn piece of plastic debit card. So, cuz I by September, I guess I'm not going to get any more papers. So, awfulness. Awfulness. All right, guys. Also, please if you haven't joined the page yet on Telegram, please do. And I'm happy to say that our

[00:49:58 - 00:50:32]

presence on Twitter seems to be expanding rapidly. And you you just can't hide this stuff. And when I when I hear the bullshit coming from Grok and when he talks about me and belittles this Intertel thing and acts like it's nothing and I realize fuckin Grok, you are Intertel. Your boss, your owners, your programmers, they're your it's all Intertel. All of it. I don't care what name of what corporation or who gets hired to do what job. At the end of the day, it's all Intertel.

[00:50:32 - 00:51:03]

All right, people. So, let's say Intertel all day. And I don't, like I said, I don't care what they try to tell you about it being nice and sweet and all that. It is mafia. Intertel mafia. It's all mafia.

Let's stop blaming the Jews or blaming the Democrats and Republicans or whatever. It's the Fucking mafia. Which mafia? The Intertel mafia. The international intertel mafia. That's all we need to remember. Let's blaze that into their memories of everybody. And how does that serve us?

[00:51:03 - 00:51:48]

Because the Intertel mafia is the Getty. Getty is Intertel mafia. And by occupying the Getty, we destroy the enemy. Who's the enemy? The Intertel Mafia. You want to put a name on it? It's all those people. But they are the Intertel Mafia. Again, I want to thank you all for being here. Please tune in and please join my Telegram group OccupyTheGetty/Steven D Kelley and get active, spread the word. And if you can help me out with this video here and teach more people about the Intertel stuff and this Palantir stuff and make sure that everyone understands that it's one big

[00:51:48 - 00:52:33]

mafia, maybe we're going to get somewhere. Okay, so keep doing it. It seems like it's working. And it's working because of you. Yes, Trump is a pedophile. Let's not forget that. They're all pedophiles. And what else? They're all Intertel. Good night. My name is Steven D. Kelley this is the Steven D. Kelley show. And we are Truthcat Radio. www.truthcatradio.com. It's 73 degrees Fahrenheit and sunny. Beautiful downtown La Puente California. It is now 6:53 p.m. and it's still August 14, 2025. And once again, I want to thank you for being with me,

[00:52:34 - 00:53:14]

all of you. Can't do it without you, okay? Make me famous, people. Remember, I'm the only one you know who was part of the Intertel Mafia. Not just part of the Intertel Mafia. I killed their boss. I got their boss killed. I got him in the damn jail. All right, you don't believe it, talk to Rambo. But guess what? I don't need to make this shit up. It's real. Okay, let's run with it. Okay, people. Thank you so much for everything. Please keep it up. You are truly the hero Jedi. I love you all. Good night. God bless. Adios. And goodbye.
